**Contents of delivery:** All LSD solutions come completely pre-assembled right out of the box, including all necessary installation hardware, wires, plug connectors and insulation materials for the extension of the - *supplied by customer* - original wire harness

**Delivery time:** In stock products ship within 3 - 5 days, subject to prior sale

**Our delivery program is growing steadily! Check the new applications at [www.lsd-doors.com](http://www.lsd-doors.com)**

**Important footnote for the gas springs:**

- the gas spring was balanced due to the weight of a original door without any additional accessories. If there is a difference in the weight of the door you may need to purchase a stronger or weaker gas spring at additional cost.
- Please note, that the gas power of the gas springs may change due to temperature variations, this may alter the force required to open and close the door. These variations are normal and are due to the nature of gas springs and should not be considered a defect.

**Footnotes:**

- a - dismantling and slight modification of the fender might be necessary
- b - only 3-door models.
- c - the original wire harness can be used by rerouting, therefore a drill hole in the A-pillar might be necessary. For further information please check the installation instructions.
- d - the wire harness extension is necessary.
- f - the standard indicator at the fender has to be slightly modified or replaced.
- g - the original windshield washer reservoir must be replaced by Ford part-no. 2S61.17618-AD and 1142518

### Estimated time of installation (ETI):

Basically we recommend to get the installation done at an authorized dealer.

o.r. on request

1 normal installation work:

appr. 1 to 1.5 working days

2 high installation work:

appr. 1.5 to 2 working days

3 higher installation work:

appr. 2 to 2.5 working days

This information is supplied without liability and was determined from an authorized dealer at an original vehicle.

### Important footnote for the gas spring:

- the gas spring was balanced due to the weight of an original door without any additional accessories.

If there is a difference in the weight of the door you may need to purchase a stronger or weaker gas spring at additional cost

- Please note, that the gas power of the gas springs may change due to temperature variations, this may alter the force required to open and close the door.

These variations are normal and are due to the nature of gas springs and should not be considered a defect.

### Content of delivery:

All LSD solutions come completely pre-assembled right out of the box, including all necessary installation hardware, wires, plug connectors and insulation materials for the extension of the - supplied by customer - original wire harness.
